PARAFFIN ELIMINATOR™

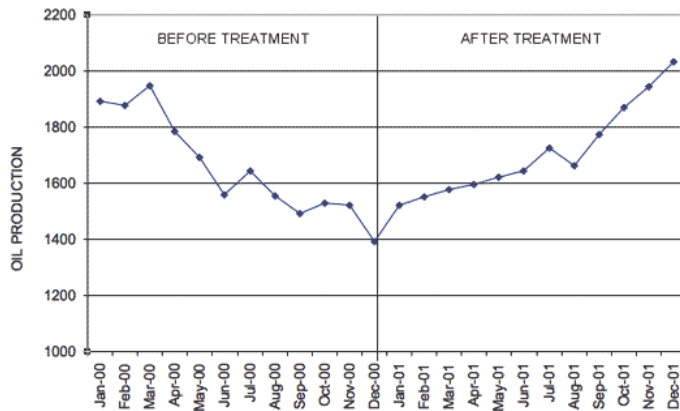

Paraffin Reliquifier

Paraffin Eliminator™ is an environmentally friendly reliquifying agent designed to reduce and control paraffin build-up in oil and gas wells.

Paraffin Eliminator™ is a 100% non-diluted product composed of smaller hydrocarbon chained elements designed to reliquify paraffin utilizing environmentally safe products. All of the constituents in Paraffin Eliminator are non-toxic, non-hazardous and are chemically designed to remove paraffin deposits.

Benefits:

- Increased Oil Production
- Reduction in Oil Viscosity
- Reduction in Corrosion
- Cleans Flow Lines
- Removes Formation Deposits
- Battery Tank Separation
- No Re-deposition of Asphaltenes
- Environmentally Friendly

Cost	Hot Oiling	Paraffin Eliminator
Cost Average	\$500	\$500
+ Propane Cost	\$150	NONE
+ Additional Oil Used	\$1,200	NONE
+ Additional Chemicals	\$500	NONE
+ Energy to Repump	\$300	NONE
Total Monthly Cost	\$2,650	\$500

Requires Unstacking	YES	NO
Site Accessible During Rain for Treatment	NO	YES
Frequency of Treatments	30 days	30 days
Reduces Electric Bill	NO	YES
\$15,000 Stripper Bills	YES	NO
Production Stabilized	NO	YES
Improves Corrosion Control	NO	YES
Frost Restriction	YES	NO
Increases Equipment Life	NO	YES
Produces Methane Gas	NO	YES
Improves Oil to Water Ratio	NO	YES
Keeps Pipes Clean	NO	YES
Reduces Sludge Buildup in Tanks	NO	YES
